Choose where not to compete.

A workshop framework for turning broad ambition into explicit choices.

Separate aspiration from a decision.

Aspiration

“Be the most useful partner.” Useful as a direction, insufficient as a resource choice.

Decision

Prioritize one customer problem, name the owner and define what will be deferred.

Make the assumptions visible.

Customer problem

Strategic choice

Evidence to seek

A choice links a problem to a testable expectation.

A roadmap is not the strategy.

A delivery sequence is useful only when it serves a clearly stated choice.

Leave with a choice, not another slogan.

Record the commitment, the trade-off, the accountable owner and the date for review.
